

We connect the dots between ESG Promises and Achievement.

YOUR DIGITAL ESG TRANSFORMATION

The world's attention has shifted towards ESG, and organisations are facing increased reporting demands from both regulators and investors, as well as enhanced customer scrutiny. Business strategy, for organisations of all sizes, must evolve rapidly to align with positive ESG principles. **To succeed, organisations must transition to a proactive and measured approach to mitigate their ESG impact and provide relevant and transparent performance reports.**

TEKenable's ESG solutions leverages the Microsoft Cloud for Sustainability framework to deliver an optimised and central data architecture to overcome these challenges. We utilise Microsoft's cloud-based technologies to enable secure data storage and seamless integration between systems. Supplemented with real-time data and analytical tools to inform and improve your sustainable development planning and satisfy reporting requirements.

Microsoft Sustainability Manager is an extensible solution that unifies data intelligence and enables comprehensive, integrated, and increasingly automated sustainability management for organisations at any stage of their sustainability journey.

WHY TEKENABLE?

We combine over 20 years of experience as a Microsoft managed partner with Data and AI solution design and ISO 9001 & ISO 27001 certification ensuring our security credibility.
