

Health Check

Dynamics 365

Are you getting enough return from your Dynamics 365 investment?

We offer Health Checks to help organisations drive greater value from their existing setup.

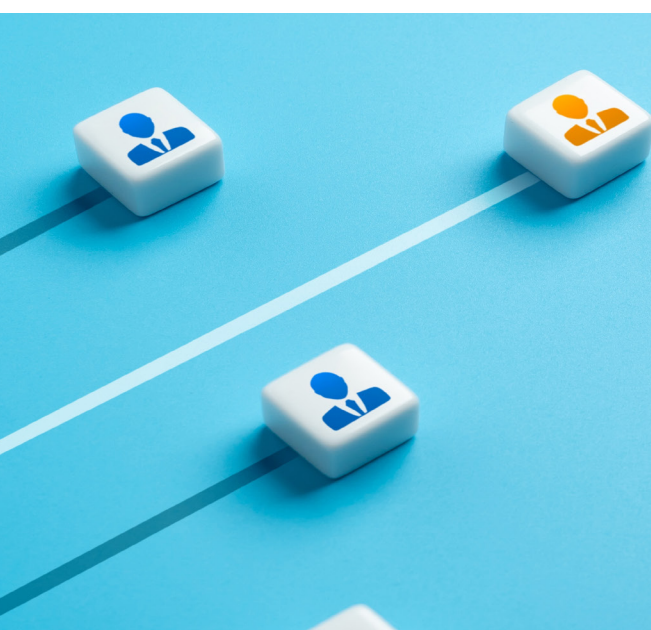

Why a Health Check?

-  To **bolster defences** and help avoid a security breach.
-  To **stay up-to-date** on the latest App/Platform releases.
-  To provide more **actionable intelligence** via improved reporting.
-  To provide a **solid foundation** to help you **build out new solutions**.
-  To help **improve user experience**.
-  To help you **evolve your Dynamics 365 deployment** and **avoid stagnancy**.
-  To get a **better return on investment**.
-  To **better meet demands** of your business.

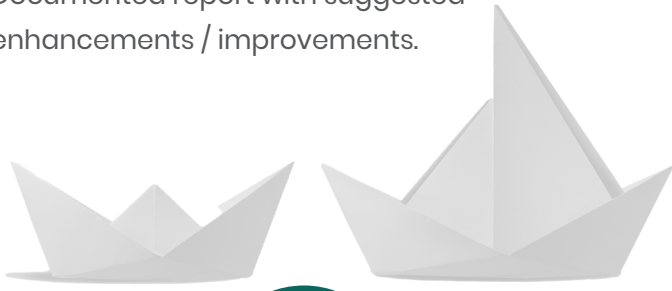

You'll come away with:

- **Recommendations for improvements** based on our review.
- **Feedback call** outlining actionable insights to make better use of your Dynamics instance.
- A **digital roadmap** proposing a path to roll out changes /enhancements and future digital transformation projects.

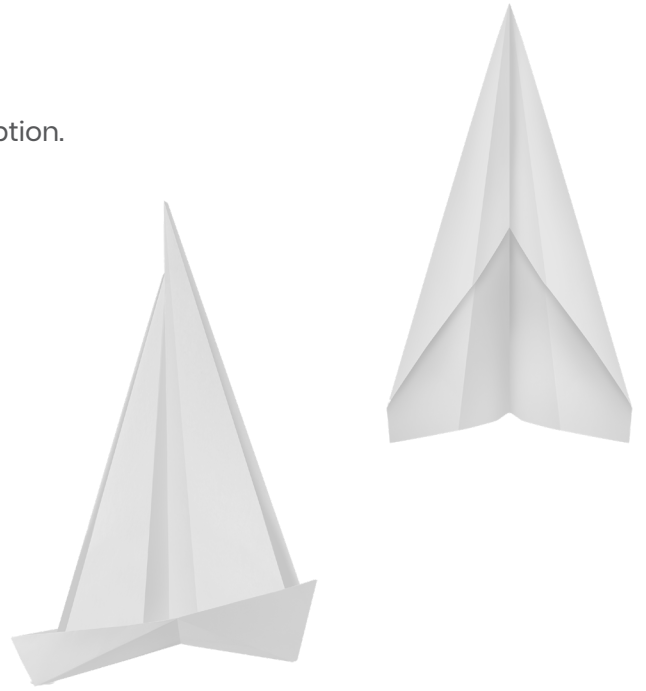

How to get started:

1. Initial call to help us tailor the Health Check to your specific Dynamics 365 implementation (what you are using, how you are using it).
2. Perform a systems Health Check of your organisation.
3. Workshops to better understand usability and user adoption.
4. All analysis will be done remotely.
5. Playback of findings on completion of Health Check.
6. Documented report with suggested enhancements / improvements.

Quick wins:

Some of the common quick wins we see across our clients are enhanced security, improved data, more meaningful reports and dashboards, optimised configuration for enhanced usability, increased productivity and increased ROI.

How much:

We provide a non-chargeable, no-commitment initial consultation and offer 3 tiered packages – Gold, Silver & Bronze – depending on the complexity of your Dynamics 365 setup.

Ready to get the most out of your Dynamics 365 implementation.

Contact our experts to discover how a Health Check can assess, monitor, and enhance your business performance.
