

Business Central Multi-entity Solution

Microsoft Dynamics 365 Business Central helps multi-entity organisations simplify finance and operations with a unified platform for governance, intercompany management and consolidated reporting.

Challenges faced

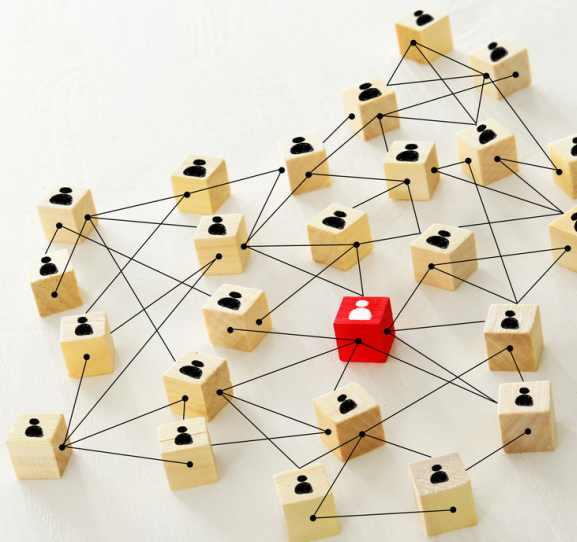

As organisations grow through expansion or acquisition, finance processes can become increasingly complex, with challenges around fragmented systems, manual reporting, limited visibility, intercompany transactions and integration.

TEKenable helps address these issues by **providing a unified foundation for multi-company management, financial control, compliance, workflows and reporting.**

What Business Central enables

- **One group finance foundation.** Consistent finance processes across multiple entities.
- **Better visibility across the group.** Providing greater visibility across entities, departments and regions.
- **Simpler intercompany processing.** Reduce intercompany complexity with streamlined transactions, reporting and controls.
- **Local flexibility with central control.** Support local requirements with consistent governance and control across the group.
- **A platform that can grow with the organisation.** Supports new users, new entities, acquisitions and additional reporting requirements over time.

The business benefits

Faster, more reliable reporting:

Create a clearer view of performance across the group, with consistent data and fewer manual reporting steps.

Improved financial control:

Strengthen approvals, audit trails, access controls and financial processes across multiple entities.

Reduced manual effort:

Reduce manual effort with automated workflows, document capture and intercompany controls.

Better decision-making:

Give finance and leadership teams access to more current, consistent and trusted data across the organisation.

More scalable growth:

Create a scalable ERP foundation for growth and expansion.

Stronger Microsoft integration:

Seamlessly integrates with Microsoft 365, Teams, Power BI and Power Platform.

Who this is for

This offering is designed for organisations that need better control and visibility across a complex operating model, including:

- Groups with multiple legal entities.
- Organisations expanding through acquisition.
- Businesses operating across the UK, Ireland and international markets.
- Multi-site service, manufacturing or distribution organisations.
- Finance teams replacing legacy ERP, NAV, Sage, Xero or disconnected accounting tools.
- Organisations that need group reporting, local flexibility and stronger governance.
- Non-profit, regulated or public interest organisations managing funds, programmes, sites or business units.

Microsoft Dynamics 365 Business Central for Multi-entity Organisations. Run every entity from one connected finance platform.
